Ground Level

Aquifer Full Level - 12.0 Feet

Average November 1st Static Water Level -59.6 Feet

Static Water Level, November 1, 2021 -70.7 Feet

Critical Static Level
Only two wells out of five able to pump.

Pumping Level

Pump Suction

Definitions

Static Level: is the level of water in the well when no water is being taken (pumped) from the well.

Pumping Level: is the level of water in the well during pumping.

Critical Satic Level: is the level where many of our wells can no longer pump water and we must use much more water from Lake Casitas.

ALWAYS CONSERVE WATER!
