INDEPENDENT AUDITOR'S REPORT

**To the Board of Directors
Ventura River Water District:**

Report on the Financial Statements

We have audited the accompanying financial statements of the Ventura River Water District (the "District") as of and for the years ended June 30, 2021 and 2020, and the related notes to the financial statements, which collectively comprise the Ventura River Water District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, as well as the accounting systems prescribed by the State Controller's Office and state regulations governing special districts; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the State Controller's *Minimum Audit Requirements for California Special Districts*. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Ventura River Water District as of June 30, 2021 and 2020, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America, as well as accounting systems prescribed by the State Controller's Office and state regulations governing special districts.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 5 through 10, the California Public Employees' Retirement System Schedule of Ventura River Water District's Proportionate Share of the Net Pension Liability on page 34, and the California Public Employees' Retirement System Schedule of Ventura River Water District's Contributions on page 35, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audits were conducted for the purpose of forming opinion on the financial statements that collectively comprise the Ventura River Water District's financial statements as a whole. The Ventura River Water District Statement of Revenues, Expenses and Changes in Net Position - Budget to Actual on page 36, the Schedule of Selected Operating Expenses on page 37 and the Organization of the District on pages 38 through 39 are presented for purposes of additional analysis and are not a required part of the financial statements. The aforementioned supplemental information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial

statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements as a whole.

VENTURA RIVER WATER DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the Ventura River Water District (the "District"), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities for the fiscal years ended June 30, 2021 and June 30, 2020.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements.

This report also contains other supplementary information in addition to the basic financial statements themselves. The basic financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business. The basic financial statements can be found on pages 11-15 of this report. The business-type activities of the District are conducted by the District, which is governed by its own elected five-person board of directors. The District's only business is providing domestic water. The District uses enterprise funds to account for its water operations.

The *Statements of Net Position* are intended to disclose the financial position of the District at a specific point in time, June 30, 2021 and June 30, 2020. It reflects the assets and deferred outflows of the District, as well as the liabilities, deferred inflows, and net position (equity). Assets and liabilities are listed in order of their estimated liquidity. Cash and other unrestricted assets readily convertible to cash are listed first. Capital assets are listed near the bottom of assets because they are highly illiquid. Further, capital assets are reduced by depreciation. This is the estimated diminution of value attributable to the wear and tear of assets caused by the usage and the passage of time.

The *Statements of Revenues, Expenses and Changes in Net Position* are intended to disclose the results of operations over a period of time, the fiscal year ended June 30, 2021 and June 30, 2020. This statement reflects revenues earned (whether collected or not), and expenses incurred (whether paid or not) during the year. This statement differs significantly from the statement of net position, yet coordinates well with that statement. The net earnings of the District flows into the net position of the District as reflected on the statement of net position.

The *Statements of Cash Flows* combine aspects of both the statement of net position and the statement of revenues, expenses and changes in net position and discloses how cash flows through the District.

Other Information

In addition to the basic financial statements, this report also presents certain *required supplementary information* concerning the District's progress in funding its obligations. *Required supplementary information* can be found on pages 34-35 of this report. *Supplementary information* concerning the organization of the District, selected operating expenses, and budget to actual report can be found on pages 36-39.

Financial Analysis and Highlights

The assets and deferred outflows of the District exceeded its liabilities and deferred inflows at the close of the most recent fiscal year by \$8,511,326 (*net position*). Of this amount \$2,348,267 (*unrestricted net position*) may be used to meet the District's ongoing obligations to citizens and creditors and provide for projected capital improvements as outlined in the District's 10-year capital improvement plan.

**VENTURA RIVER WATER DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS**

The statement of net position presents information on all of the District's assets and deferred outflows and liabilities and deferred inflows, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The District's total net position increased by \$718,010. Overall, Operating Revenues increased by \$480,781. Water Sales increased by \$496,659 due primarily to increased consumption. Total Operating Expenses increased by \$90,673. The largest portions of the increase includes utilities and water purchase/casitas base fees. There was more water consumed this fiscal year compared to fiscal year end 2020. Southern California Edison also increased their rates, and more electricity was consumed this year due to the higher water consumption. The increase water consumption caused an increase of cost in water purchase from Casitas Municipal Water District, as well as their 12% rate increase. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows. Thus some revenues and expenses are reported for some items that will only result in cash flows (inflows and outflows of cash) in future fiscal periods (e.g. earned but unused vacation leave).

The District's total liabilities and deferred inflows of resources increased \$103,708.

Investment in capital of \$6,163,059 is the largest portion of the District's net position as of June 30, 2021 (72%) and reflects its investment in land, buildings, machinery and equipment. The District uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Although the District's investment in capital assets is reported net of debt, it is not a spendable resource. The resources needed to repay debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. The *unrestricted net position* \$2,348,267 (28%) may be used to meet the District's ongoing obligations to citizens and creditors.

**Table 1
Net Positions Components**

Description	2021	2020	2019
Current Assets	\$ 1,973,012	\$ 1,683,684	\$ 3,061,505

Operating Revenues vs. Operating Expenses**

**Table 4
Operating Revenue by Source**

**VENTURA RIVER WATER DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Analysis of balances and transactions of funds

The District is a single purpose, proprietary entity, and as such, does not maintain multiple fund types. Consequently, there are no inter-fund balances. The analysis of balances is shown above in tables one and two, and in the section labeled "Financial Analysis and Highlights".

Analysis of variations between original and final budget amounts

The District adopts its budget in accordance with California law. It is policy to not modify the budget in total, although certain reallocations of expenditures may occasionally be made. The budget is adopted on a projected cash flow basis. Consequently, it reflects such items as projected capital expenditures as cash outflows that are not recognized as expenses under Generally Accepted Accounting Principles.

VENTURA RIVER WATER DISTRICT				
Table 5				
Significant Budget Variances-Expenses				
Description	Budget	Actual	Variance	Explanation
Utilities	\$ 110,000	\$ 145,726	\$ (35,726)	Increased usage and cost of utilities (specifically electricity)
Contract Labor	\$ 81,445	\$ 92,812	\$ (11,367)	Multiple unexpected leaks and cost of material increase
Depreciation	\$ 350,000	\$ 331,500	\$ 18,500	Over-budgeted and did not complete some anticipated projects
			<u>\$ (28,593)</u>	

This year the District was under budget in Capital Expenditures. This was primarily due to some projects being postponed. See below for brief explanation of the largest variances.

VENTURA RIVER WATER DISTRICT				
Table 5b				
Significant Budget Variances - Capital Improvement Projects				
Description	Budget	Actual	Variance	Explanation
Hydrants & Valves	\$ 12,000	\$ 96,110	\$ (84,110)	Materials for the FY22 Hydrant and Valve Project had to be ordered ahead of time due to supply delays
Well #5 Replacement	\$ 15,000	\$ 8,236	\$ 6,764	Project not complete
Re-plumb Encino & Thomas PRV Vaults - Design	\$ 126,000	\$ 28,230	\$ 97,770	Design phase. Rollover into next year/construction not started
Laptops for Board Of Directors	\$ 7,000	\$ 1,684	\$ 5,316	Project not complete
			<u>\$ 25,740</u>	

Capital Assets

The District's investment in capital assets for its business type activities as of June 30, 2021 amounts to \$6,163,059 (*net of accumulated depreciation*). This investment in capital assets includes land, buildings, water system facilities, improvements, and machinery and equipment. The total increase in the District's investment in capital assets for the current fiscal year was \$73,178 due to additions and transfers from construction in progress.

Total capital assets	11,794,963		11,390,285		10,388,919
Less: Accumulated depreciation	(5,631,904)		(5,300,404)		(5,009,238)
Net capital assets	\$ 6,163,059	\$	6,089,881	\$	5,379,681

Additional information on the District's capital assets can be found in Note 1 on page 17 and Note 5 on page 23 of this report.

Infrastructure Assets

The District has adopted the recommended approach of GASB Statement No. 34 with regard to infrastructure assets. All identifiable infrastructure assets have been capitalized at their purchase cost, estimated value for contributed or donated assets, or estimated cost for those items expensed in prior years and not previously capitalized.

Economic Factors and Rates

- The water budget rate structure implemented in February 2018 remained in effect during this fiscal year. The budget rate structure was not changed.
- There was a rate increase in September 2020. In March 2021, there was a decrease in base fees and a 4% net increase in water rates.

All of these factors were considered in preparing the District's budget for the 2021-2022 fiscal year.

Requests for Information

This financial report is designed to provide a general overview of the District's financial position for all those with an interest in the District's finances. Questions or requests for additional financial information should be directed to: Ventura River Water District, 409 Old Baldwin Road, Ojai, CA 93023

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 1 – Reporting Entity and Summary of Significant Accounting Policies

A) Reporting Entity

The Ventura River Water District (the “District”) reporting entity includes all significant operations and revenue sources of which the District Board of Directors exercises oversight responsibility and is determined under the criteria established by the GASB codification standards. Oversight responsibility is determined on the basis of selection of the governing board, designation of management, ability to significantly influence operations, accountability for fiscal matters, and the scope of public service.

B) Accounting Basis

The District is accounted for as an enterprise fund in accordance with generally accepted accounting principles (GAAP) as applied to governmental units. Enterprise funds are used to account for operations (a) that are financed and operated in a manner similar to private business enterprises, where the expenses, including depreciation, of providing goods or services to the general public are recovered through user charges, or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and net income is appropriate for capital maintenance, public policy, management control, and other purposes. Because the District is accounted for as an enterprise fund, the accrual method of accounting is used for financial statement reporting purposes. Revenues are recognized when they are earned, and expenses are recognized when they are incurred.

An enterprise fund is accounted for on a cost of services or “flow of economic resources” measurement focus. This means that all assets and liabilities (whether current or noncurrent) associated with the activity are included on the statement of net position.

The District distinguishes operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and the producing and delivering of goods in connection with the District’s principal ongoing operations. The principal operating revenues of the District are charges to customers for water sales. Operating expenses of the District include cost of sales and services, administrative expenses, and depreciation of capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

C) Cash

For purposes of the statement of cash flows, cash includes cash on hand and funds on deposit with financial institutions available for current use with an initial maturity of three months or less. The District maintains bank accounts at financial institutions located within the County of Ventura. All deposits are carried at cost plus accrued interest.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 1 – Reporting Entity and Summary of Significant Accounting Policies (Continued)

D) Cash Equivalents

As of June 30, 2021, the District has the following investments authorized by legal or contractual provisions: Local Agency Investments Fund (LAIF) and Funds in County Treasury. It is the District's policy to maintain all investments in insured accounts in the District's name. California statutes authorize districts to invest idle or surplus funds in a variety of credit instruments as provided for in the California Government Code, section 53600, Chapter 4 - Financial Affairs.

E) Accounts Receivable

Accounts receivable, as reflected in the financial statements, are from customers whose property is located within the County of Ventura. Historically, uncollectible amounts have been negligible, therefore the District has not established an allowance for doubtful accounts. The District uses the write-off method to discharge amounts deemed uncollectible at year-end. While the write-off method is not in accordance with GAAP, the results are consistent with the allowance method and the effect on the financial statements is immaterial.

F) Capital Assets

Minor expenditures for renewals and betterments are charged to expense. Major expenditures for renewals and betterments over \$2,000 are capitalized. In cases where assets are donated to the District, construction costs or estimated market values are recorded. Costs of assets sold, accounts, and gains or losses on disposition are included in operations.

The cost of property and equipment is depreciated over the estimated lives of the assets from the date of acquisition based on the straight line method of depreciation, with estimated lives for computation of depreciation as follows:

Buildings	5 - 30 years
Vehicles	5 years
Furniture and equipment	3 - 20 years
Utility plant	3 - 50 years

G) Compensated Absences

The District has recorded an accrual for compensated absences in accordance with the District's policy. Total paid time off shall not exceed 800 hours, Sick leave is included in the accrual as the District pays for unused sick time at the rate of 50% of total available hours. Effective January 1, 2020, sick leave is no longer earned but paid time off was increased by one working day per month. Existing sick leave will remain until utilized or terminated.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 1 – Reporting Entity and Summary of Significant Accounting Policies (Continued)

H) Budget

The District is required to adopt annual budgets. The budget is presented on the basis of the funding sources available. The following procedures are followed in establishing the budgetary data reflected in the financial statements:

1. The District prepares a tentative budget for the next fiscal year beginning July 1. The operating budget includes proposed expenditures and the means of financing them.
2. Prior to July 1, the final budget is adopted by the District. Once a budget is approved, it can be amended by the Board of Directors.

I) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

J) Net Position

Net position represents the difference between assets and deferred outflows and liabilities and deferred inflows and is classified into three components as follows:

Net investment in capital assets – This component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Net investment in capital assets excludes unspent debt proceeds. The District does not have any capital related debt.

Restricted – This component of net position consists of assets which are legally restricted by outside parties for use for a specific purpose.

Unrestricted – This component of net position consists of net position that does not meet the definition of “restricted” or “net investment in capital assets.” Dedicated net position represents unrestricted assets which are segregated by the Board of Directors for specific future uses.

When an expense is incurred for purposes for which both unrestricted and restricted resources are available for use, it is the District's policy to apply restricted assets first, then unrestricted resources.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 1 – Reporting Entity and Summary of Significant Accounting Policies (Continued)

K) Pension Plan

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the plans and additions to/deductions from the Plans' fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

The following timeframes are used for pension reporting:

Valuation Date	June 30, 2019
Measurement Date	June 30, 2020
Measurement Period	July 1, 2019 to June 30, 2020

L) Governmental Accounting Standards Board (GASB) Statements – Future Updates

The Governmental Accounting Standards Board Statements listed below will be implemented in future financial statements. These statements will be evaluated by the District to determine if they will have a material impact to the financial statements once effective.

Statement No. 87	<i>"Leases"</i>	The requirements of this statement are effective for periods beginning after June 15, 2021. (FY 21/22)
Statement No. 89	<i>"Accounting for Interest Cost Incurred Before the End of a Construction Period"</i>	The requirements of this statement are effective for periods beginning after June 15, 2021. (FY 21/22)
Statement No. 91	<i>"Conduit Debt Obligations"</i>	The requirements of this statement are effective for periods beginning after June 15, 2021. (FY 21/22)
Statement No. 93	<i>"Replacement of Interbank Offered Rates"</i>	The requirements of this statement are effective for periods beginning after June 15, 2021. (FY 21/22)
Statement No. 94	<i>"Public-Private and Public-Public Partnerships and Availability Payment Arrangements"</i>	The requirements of this statement are effective for periods beginning after June 15, 2021. (FY 21/22)
Statement No. 96	<i>"Subscription-Based Information Technology Arrangements"</i>	The requirements of this statement are effective for periods beginning after June 15, 2021. (FY 21/22)

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 2 – Cash and Investments

Cash and investments are comprised of the following at June 30, 2021 and 2020:

	2021	2020
Cash and cash equivalents:		
Petty cash	\$ 581	\$ 581
Deposits with financial institutions	135,307	157,696
Local Agency Investment Fund	802,424	571,494
Funds in County Treasury	636,715	586,530
Total cash and cash equivalents	1,575,027	1,316,301
Investments:		
General investment account	952,942	500,105
Total investments (non-cash equivalents)	952,942	500,105
Total cash and investments	\$ 2,527,969	\$ 1,816,406

Cash and investments are classified in the accompanying financial statements at June 30, 2021 and 2020 as unrestricted, except for cash restricted for customer deposits reflected within the deposits with financial institutions above. At June 30, 2021 and 2020, the District held restricted deposits of \$16,019 and \$10,737, respectively.

Fair Value Measurements

The District is a voluntary participant in the Local Agency Investment Fund (LAIF) that is regulated by the California Government Code under the oversight of the Treasurer of the State of California. The fair value of the District’s investment in this pool is reported in the accompanying basic financial statements at the amounts based upon the District’s pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis. The District’s portion of the funds held in County Treasury is measured at fair value as of June 30, 2021 and 2020.

Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization.

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that in the event of the failure of the counterparty to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 2 – Cash and Investments (Continued)

Custodial Credit Risk (Continued)

With respect to investments, custodial credit risk generally applies only to direct investments in marketable securities. Custodial credit risk does not apply to a local government's indirect investment in securities through the use of mutual funds or a government investment pool.

The California Government Code and the District's investment policy do not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments, other than the following provision for deposits. The California Government Code requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law. The market value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. California law also allows financial institutions to secure District deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposit. As of June 30, 2021 and 2020, respectively, the District's cash balance and Certificates of Deposit were covered by federal depository insurance.

Investments Authorized by the District's Investment Policy

The District's investment policy is to invest funds in a manner which will provide maximum security while meeting the daily cash flow demands of the District, earning a conservative investment return and conforming to all statutes governing the investment of District funds. All investment types are in accordance with California Government Code.

Fair Value of Investments

The District measures and records its investments using fair value measurements guidelines established by generally accepted accounting principles. These guidelines recognize a three-tiered fair value hierarchy, as follows:

- Level 1: Quoted Prices for identical investments in active markets;
- Level 2: Observable inputs other than quoted market prices; and
- Level 3: Unobservable inputs

The table below sets forth by level, within the fair value hierarchy, the District's assets as fair value as of June 30, 2021:

<u>Investment Type</u>	<u>Total Fair Value</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Certificates of deposit	\$ 952,942	\$ -	\$ 952,942	
Total	<u>\$ 952,942</u>	<u>\$ -</u>	<u>\$ 952,942</u>	<u>\$ -</u>

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 2 – Cash and Investments (Continued)

The table below sets forth by level, within the fair value hierarchy, the District’s assets as fair value as of June 30, 2020:

<u>Investment Type</u>	<u>Total Fair Value</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Certificates of deposit	\$ 500,105	\$ -	\$ 500,105	
Total	<u>\$ 500,105</u>	<u>\$ -</u>	<u>\$ 500,105</u>	<u>\$ -</u>

Certificates of deposit are valued using various market and industry inputs.

Interest Rate Risk

Interest rate risk is the risk that changes in the market interest rate will adversely affect the fair value of an investment. The District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The District did not have any investments with fair values that are considered to be highly sensitive to changes in interest rates.

The Certificates of Deposit that the District is invested in are long-term, maturing from 2023 through 2025.

Note 3 – Restricted Cash/Security Deposits

Cash has been set aside as well as a corresponding liability for the eventual refund of customer security deposits. Customer security deposits are requested from new customers unless they can prove good credit. Customers with deposits on file who have reached a satisfactory good payment history of approximately 18 months received a refund of their deposit.

Note 4 – Joint Powers Insurance Authority

The District is a member of the "Association of California Water Agencies Joint Powers Insurance Authority" (ACWA/JPIA). The ACWA/JPIA was formed in 1979 by the water agencies of the state of California to provide insurance benefits to its member agencies, including the District. The ACWA/JPIA provides risk-sharing pools to meet the needs of its members for insurance coverage. The risk-sharing pools are a cost-effective form of risk management available only to public entities, allowing them to bypass the high cost of commercial insurance.

It is the District's policy to record as expense all amounts paid to the authority for employee health benefits coverage. The District does not recognize as an asset any "equity" that it may accrue as a member of the joint powers authority as it is believed that any such "equity" would simply convert to adjustments of future premiums. The District does not recognize as a liability any deficiency for amounts self-insured by the authority, as it is not measurable, nor is there any certainty of payment. Any such amount would also convert to adjustments of future premiums.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 5 – Capital Assets

Schedules of changes in capital assets, as well as depreciation for the fiscal years ended June 30, 2021 and 2020 are shown below:

**VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS**

Note 6 – Defined Benefit Pension Plan

General Information about the Pension Plans

Plan Descriptions – All qualified employees are eligible to participate in Ventura River Water District’s Miscellaneous Employee Pension Plans, cost-sharing multiple employer defined benefit pension plans administered by the California Public Employees’ Retirement System (CalPERS). Benefit provisions under the Plans are established by State statute and local government resolution. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions and membership information that can be found on the CalPERS website. Eligible employees hired after January 1, 2013 that are considered new members as defined by the Public Employees’ Pension Reform Act (PEPRA) are participating in the PEPRA Miscellaneous Plan.

Benefits Provided – CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, as discussed above. Members with five years of total service are eligible to retire at age 50 or 52 if in the PEPRA Miscellaneous Plan with statutorily reduced benefits. An optional benefit regarding sick leave was adopted. Any unused sick leave accumulates at the time of retirement will be converted to credited service at a rate of .004 years of service for each day of sick leave. All members are eligible for non-duty disability benefits after 10 years of service. The system also provides for the Optional Settlement 2W Death Benefit. The cost of living adjustments for all plans are applied as specified by the Public Employees’ Retirement Law.

The Plans’ provisions and benefits in effect at June 30, 2021 are summarized as follows:

	Miscellaneous Plan - For the Year Ended June 30, 2021	
	Classic	PEPRA
Hire date	Prior to January 1, 2013	On or after January 1, 2013
Benefit formula	2% @ 60	2% @ 62
Benefit vesting schedule	5 years of service	5 years of service
Benefit payments	monthly for life	monthly for life
Retirement age	50 - Minimum	52 - Minimum
Monthly benefits, as a % of eligible compensation	1.4% to 2.4%	1.0% to 2.5%
Required employee contribution rates	7.0%	6.8%
Required employer contribution rates	8.8%	7.7%
Required employer contribution rates for payment on all UAL amortization bases	7.0%	1.3%

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 6 – Defined Benefit Pension Plan (Continued)

The Plans’ provisions and benefits in effect at June 30, 2020 are summarized as follows:

	Miscellaneous Plan - For the Year Ended June 30, 2020	
	Classic	PEPRA
Hire date	Prior to January 1, 2013	On or after January 1, 2013
Benefit formula	2% @ 60	2% @ 62
Benefit vesting schedule	5 years of service	5 years of service
Benefit payments	monthly for life	monthly for life
Retirement age	50 - Minimum	52 - Minimum
Monthly benefits, as a % of eligible compensation	1.4% to 2.4%	1.0% to 2.5%
Required employee contribution rates	7.0%	6.8%
Required employer contribution rates	8.1%	7.0%
Required employer contribution rates for payment on all UAL amortization bases	6.0%	0.7%

Contributions – Section 20814(c) of the California Public Employees’ Retirement Law requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate.

Funding contributions for both Plans are determined annually on an actuarial basis as of June 30 by CalPERS. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The District is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

Beginning in fiscal year 2016, CalPERS collects employer contributions for the Plan as a percentage of payroll for the normal cost portion as noted in the rates above, and as a dollar amount for contributions toward the unfunded liability. The District’s required contribution for the unfunded liability was \$33,647 and \$27,395 for the fiscal years ended June 30, 2021 and 2020, respectively.

For the years ended June 30, 2021 and 2020, the contributions recognized as part of pension expense for all Plans were as follows:

	Miscellaneous Plan	
	June 30, 2021	June 30, 2020
Contributions – employer	\$ 72,621	\$ 62,062

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 6 – Defined Benefit Pension Plan (Continued)

Pension Liabilities, Pension Expenses and Deferred Outflows/Inflows of Resources Related to Pensions

As of June 30, 2021 and 2020, the District reported net pension liabilities for its proportionate shares of the net pension liability of all Plans as follows:

	Proportionate Share of Net Pension Liability	
	For the Year Ended	For the Year Ended
	June 30, 2021	June 30, 2020
Miscellaneous	520,913	455,250

The net pension liability was measured as of June 30, 2020, and the total pension liability for the Plan used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2019 rolled forward to June 30, 2020 using standard update procedures. The District's proportion of the net pension liability was based on a projection of their long-term share of contributions to the pension plans relative to the projected contributions of all participating employers, actuarially determined. The District's proportionate share of the net pension liability for all Plans with an actuarial valuation date of June 30, 2019 and 2018 was as follows:

	For the Year Ended June 30, 2021 (Measurement date of June 30, 2020)		For the Year Ended June 30, 2020 (Measurement date of June 30, 2019)
	Miscellaneous		Miscellaneous
Proportion – June 30, 2018	0.01137%	Proportion – June 30, 2017	0.01054%
Proportion – June 30, 2019	0.01235%	Proportion – June 30, 2018	0.01137%
Change – Increase (Decrease)	0.00098%	Change – Increase (Decrease)	0.00083%

For the years ended June 30, 2021 and 2020, the District recognized pension expense of \$130,857 and \$131,396, respectively. At June 30, 2021 and 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 6 – Defined Benefit Pension Plan (Continued)

	June 30, 2021		June 30, 2020	
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources
Pension contributions subsequent to measurement date	\$ 83,609	\$ -	\$ 72,621	\$ -
Differences between actual and expected experience	26,844		31,619	(2,450)
Changes in assumptions		(3,715)	21,708	(7,695)
Change in employer's proportion	49,131		42,736	-
Difference between the employer's contributions and the employer's proportionate share of contributions		(39,119)	-	(36,770)
Net differences between projected and actual earnings on plan investments	15,475		-	(7,959)
	<u>\$ 175,059</u>	<u>\$ (42,834)</u>	<u>\$ 168,684</u>	<u>\$ (54,874)</u>

Deferred outflows of resources and deferred inflows of resources above represent the unamortized portion of changes to net pension liability to be recognized in future periods in a systematic and rational manner.

During the fiscal year ended June 30, 2021, \$72,621 in deferred outflows of resources related to contributions subsequent to the measurement date was recognized as a reduction of the net pension liability. During the fiscal year ended June 30, 2022, \$83,609 in deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense as follows:

Year Ended June 30:	
2022	\$ 12,153
2023	16,144
2024	12,897
2025	7,422
2026	-
Thereafter	-
	<u>\$ 48,616</u>

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 6 – Defined Benefit Pension Plan (Continued)

Initial unfunded liabilities are amortized over a closed period that depends on the plan’s date of entry into CalPERS. Subsequent plan amendments are amortized as level percentage of pay over a closed 20-year period. Gains and losses that occur in the operation of the plan are amortized over a 30-year rolling period. If the plan’s accrued liability exceeds the actuarial value of plan assets, then the amortization payment on the total unfunded liability may not be lower than the payment calculated over a 30 year amortization period.

Actuarial Assumptions – The total pension liabilities in the June 30, 2019 and 2018 actuarial valuations were determined using the following actuarial assumptions:

	For the Year Ended June 30, 2021		For the Year Ended June 30, 2020	
	Miscellaneous		Miscellaneous	
Valuation Date	June 30, 2019		June 30, 2018	
Measurement Date	June 30, 2020		June 30, 2019	
Actual Cost Method	Entry Age Normal Cost Method in accordance with the requirements of GASB Statement No. 68		Entry Age Normal Cost Method in accordance with the requirements of GASB Statement No. 68	
Actuarial Assumptions				
Discount Rate	7.15%		7.15%	
Inflation	2.50%		2.50%	
Projected Salary Increase	Varies by entry age and service (1)		Varies by entry age and service (1)	
Investment Rate of Return	7.15% (2)		7.15% (2)	
Mortality	Derived using CalPERS Membership Data for all Funds		Derived using CalPERS Membership Data for all Funds	
Post Retirement Benefit	Contract COLA up to 2.5% until Purchasing Power		Contract COLA up to 2.5% until Purchasing Power	
Increase	Protection Allowance Floor on Purchasing Power applies, 2.5% thereafter		Protection Allowance Floor on Purchasing Power applies, 2.5% thereafter	

(1) Depending on age, service and type of employment

(2) Net of pension plan investment and administrative expenses, including inflation

The mortality table used was developed based on CalPERS-specific data. The table includes 15 years of mortality improvements using Society of Actuaries Scale 90% MP 2016. For more details on this table, please refer to the December 2017 experience study report (based on CalPERS demographic data from 1997 to 2015) that can be found on the CalPERS website.

Changes in Benefit Terms - Public agencies can make changes to their plan provisions and such changes occur on an ongoing basis. A summary of the plan provisions that were used for a specific plan can be found in the plan’s annual valuation report.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 6 – Defined Benefit Pension Plan (Continued)

Discount Rate – The discount rate used to measure the total pension liability was 7.15% for the measurement periods ending June 30, 2020 and 2019. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the Plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Long-term Expected Rate of Return – The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Using historical returns of all the funds’ asset classes, expected compound returns were calculated over the short-term (first 10 years) and the long-term (11+ years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These rates of return are net of administrative expenses.

Note 6 – Defined Benefit Pension Plan (Continued)

The tables below reflect the long-term expected real rate of return by asset class at June 30, 2021 and 2020, respectively.

Asset Class	June 30, 2021			June 30, 2020		
	Net Strategic Allocation	Real Return Years 1-10 (a)	Real Return Years 11+ (b)	Net Strategic Allocation	Real Return Years 1-10 (a)	Real Return Years 11+ (b)
Global Equity	50.00%	4.80%	5.98%	50.00%	4.80%	5.98%
Global Fixed Income	28.00%	1.00%	2.62%	28.00%	1.00%	2.62%
Inflation Sensitive	0.00%	0.77%	1.81%	0.00%	0.77%	1.81%
Private Equity	8.00%	6.30%	7.23%	8.00%	6.30%	7.23%
Real Estate	13.00%	3.75%	4.93%	13.00%	3.75%	4.93%
Liquidity	1.00%	0.00%	-0.92%	1.00%	0.00%	-0.92%

(a) An expected inflation of 2.00% used for this period

(b) An expected inflation of 2.92% used for this period

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate – The following presents the District’s proportionate share of the net pension liability for all Plans, calculated using the discount rate of 7.15% for all Plans, as well as what the District’s proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

Miscellaneous Plan For the Year Ended June 30, 2021		Miscellaneous Plan For the Year Ended June 30, 2020	
1% Decrease	6.15%	1% Decrease	6.15%
Net Pension Liability	\$ 889,777	Net Pension Liability	\$ 809,623
Current Discount Rate	7.15%	Current Discount Rate	7.15%
Net Pension Liability	\$ 520,913	Net Pension Liability	\$ 455,250
1% Increase	8.15%	1% Increase	8.15%
Net Pension Liability	\$ 216,131	Net Pension Liability	\$ 162,740

Pension Plan Fiduciary Net Position – Detailed information about all pension plan fiduciary net positions is available in the separately issued CalPERS financial reports.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 7 – Property Tax Calendar

The District assessments are included on county property tax bills. Property taxes are assessed and collected each fiscal year according to the following property tax calendar:

Lien date	January 1	
Levy date	July 1 to June 30	
Due date	November 1	-First Installment
	March 1	-Second Installment
Delinquent date	December 10	-First Installment
	April 10	-Second Installment

Note 8 – Related Parties

In September of 2014, the California Legislature enacted comprehensive legislation aimed at strengthening local control and management of groundwater basins throughout the state known as the Sustainable Groundwater Management Act (SGMA). During December 2016, five agencies (Ventura River Water District, Meiners Oaks Water District, City of Ventura – Ventura Water, Casitas Municipal Water District, and the County of Ventura) that have an interest in the basin, collaborated to contribute funds to form the Groundwater Sustainability Agency known as the Upper Ventura River Groundwater Agency (UVRGA).

The District’s board of directors voted to approve handling payment of invoices for UVRGA while the agency established an office and an administrative staff. On a monthly basis, the District would invoice the other agencies for their share of the expenses related to UVRGA. In November 2017, UVRGA established an office and an administrative staff and the District no longer handles payment of invoices for UVRGA.

The District transitioned from membership contributions to groundwater extraction fees as of July 15, 2019. The semi-annual fees are based on estimated groundwater extraction of 858.38 acre-feet at a regulatory fee of \$79.16 per acre-foot, resulting in \$67,949 and \$66,859 for June 30, 2021 and 2020, respectively, in extraction fees due for the fiscal year.

The District’s board of directors voted to approve a Water Service Agreement with Tico Mutual Water Company to assume responsibility for providing potable water to each of the 43 Tico parcels. The agreement is contingent upon approval of transfer from Tico’s current provider, Casitas Municipal Water District (CMWD). The board of directors are still in the process of approving the resolution authorizing the application to Local Agency Formation Commission for merging Tico Mutual Water Company.

VENTURA RIVER WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS

Note 9 – Deferred Compensation Plan

The District offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan permits participating employees to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts are held in trust for the exclusive benefit of the employee participants and their beneficiaries. Accordingly, the assets and the liability for the compensation deferred by plan participants, including earnings on plan assets, are not included in the District's financial statements.

Note 10 – Commitment and Contingencies

The District has been named in a pending claim that was filed. As of the date of these financial statements, it is not possible to evaluate the merit of the scope of this claim. No amounts have been recorded in the financial statements related to this claim.

On January 27, 2021, Ventura River Water District entered into a grant agreement with the Wildlife Conservation Board to perform work on the Ventura Watershed Flow Enhancement and Water Resiliency Regional Framework Project. This project is estimated to cost \$143,326 and the cost is being shared between the District and Ventura County Resource Conservation District (VCRCDD). Per the agreement, VCRCDD will reimburse the District approximately \$66,479, while the District has committed to fund future costs of \$76,847. Costs will be reimbursed on a quarterly basis. As of June 30, 2021, the District has incurred \$15,000 in costs associated with the projects.

On June 16, 2021, Ventura River Water District entered into an agreement with J&H Engineering General Contractors, Inc. to complete hydrant and valve replacements for 16 fire hydrants and 20 water valves in the amount of \$187,832.

Note 11 – COVID-19

On January 30, 2020, the World Health Organization declared the coronavirus outbreak a “Public Health Emergency of International Concern” and on March 11, 2020, declared it to be a pandemic. Actions taken around the world to help mitigate the spread of the coronavirus include restrictions on travel, quarantines in certain areas, and forced closures for certain types of public places and businesses. The coronavirus and actions taken to mitigate it have had and are expected to continue to have an adverse impact on the economics and financial markets of many countries, including the geographical area in which the District operates.

Note 12 – Reclassifications

Certain reclassifications have been made to prior year balances in order to conform to current year presentation.

VENTURA RIVER WATER DISTRICT ORGANIZATION OF THE DISTRICT

Nature of Business – Ventura River Water District (The District), a public agency, was founded July 16, 1956 under County Water District Law, the laws of the state of California, as amended, with authority under the Water Code, Section 30,000 et seq. The District is authorized to issue bonds and may apply its operating revenue to reduce interest and principal on outstanding indebtedness. Taxes may be levied on all taxable property within The District's boundary. Veterans' exemptions are allowed.

The District began operations by leasing the water system from the Ventura River Mutual Water Company in the 1957-58 fiscal year. An election held April 1, 1958 authorized a bond issue of \$175,000 for the purchase of all assets of the Ventura River Mutual Water Company and for other necessary capital outlays to provide a complete and adequate water system to supply the entire district. The bonds, which carried an interest rate of 4.2%, were sold and the proceeds were received September 23, 1958. These bonds are no longer outstanding.

Location – The District covers approximately 2,103 acres located in the Ventura River drainage area, generally between the city of Ojai and the community of Casitas Springs. It operates and maintains a retail water distribution system. Water is obtained from its four active wells and from Casitas Municipal Water District and is distributed to approximately 2,150 residential and commercial constituents.

On January 1, 1979, The District annexed and officially assumed administration and operation of Waterworks District Numbers 4 and 7. Pursuant to the District Reorganization Act, commencing with Section 56,000 of the Government Code, the Board of Supervisors of the County of Ventura, as well as the Board of Directors of the Ventura County Waterworks District Numbers 4 and 7 (Waterworks) and Ventura River County Water District (VRCWD) jointly resolved to reorganize and then dissolve Waterworks' former territories and thus transferred jurisdiction from the Board of Supervisors to the Board of VRCWD.

Board of Directors – The District is governed by a Board of five directors.

The powers and functions of the Board are:

1. To enter into contracts and employ labor.
2. To acquire, hold and dispose of property, real and personal, all for the purpose of providing the public the employment of personnel, and the operation and maintenance of a water district. The District has the power of eminent domain.
3. To incur debt, liabilities, and obligations necessary to accomplish the purpose of The District.
4. To sue and be sued in the name of The District.
5. To perform such other functions as may be necessary or appropriate, so long as such other functions so performed are not prohibited by any provision of the law.

Accounts and Records – The District maintains income and expense records, and minutes of the Directors meetings.

Cash receipts and disbursements are maintained at Rabobank NA. Water services deposits are held in a separate trust account and are normally refunded after eighteen months of non-delinquent status. The savings account and LAIF, an account for surplus funds, are maintained at the County of Ventura. The state of California requires an annual report of financial transactions for special districts and compensation reporting.

VENTURA RIVER WATER DISTRICT
ORGANIZATION OF THE DISTRICT

Use of Estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Tax Rates – The District does not have a separate tax rate for the fiscal year ended June 30, 2020 but simply receives an apportionment of the county 's 1% tax levy, the maximum rate since the passage of Proposition 13.

December 15, 2021

Board of Directors
Ventura River Water District

To the Board of Directors:

We are pleased to present this letter related to our audit of the financial statements of Ventura River Water District (the District) as of and for the year ended June 30, 2021. This letter is to inform the Board of Directors about significant matters related to the conduct of the annual audit so that it can appropriately discharge its oversight responsibility, and we can comply with professional standards.

The following summarizes various matters which must be communicated to you under auditing standards generally accepted in the United States of America.

The Respective Responsibilities of the Auditor and Management

Our responsibilities under auditing standards generally accepted in the United States of America have been described to you in our arrangement letter dated August 11, 2020 which includes communication regarding the planned scope and timing of our audit and our identification of and planned audit response to significant risks of material misstatement. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities which are also described in that letter.

Significant Accounting Practices, Including Policies, Estimates and Disclosures

Preferability of Accounting Policies and Practices

Under generally accepted accounting principles, in certain circumstances, management may select among alternative accounting practices. In our view, in such circumstances, management has selected the preferable accounting practice.

Alternative Treatments within Generally Accepted Accounting Principles Discussed with Management

We did not discuss with management any alternative treatments within generally accepted accounting principles for accounting policies and practices related to material items during the current audit period.

Adoption of, or Change in, Accounting Policies

Management has the ultimate responsibility for the appropriateness of the accounting policies used by the District. The District did not adopt any significant new accounting policies nor have there been any changes in existing significant accounting policies during the current period.

Significant or Unusual Transactions

We did not identify any significant or unusual transactions or significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.

Management's Judgments and Accounting Estimates

Accounting estimates are an integral part of the preparation of financial statements and are based upon management's current judgment. The process used by management encompasses their knowledge and experience about past and current events and certain assumptions about future events. You may wish to monitor throughout the year the process used to determine and record these accounting estimates. The following describes the significant accounting estimates reflected in the District's June 30, 2021 financial statements:

Depreciation

Depreciation for capital assets is taken on a straight-line basis over the expected life of each capital asset. This method meets the generally accepted accounting principles requirement of being systematic and rational.

Net Pension Liability

In accordance with GASB Statement No. 68, each participating cost-sharing employer is required to report its proportionate share of the collective net pension liability, pension expense, and deferred outflows/inflows of resources. CalPERS actuaries calculated these amounts in accordance with the parameters of GASB 68.

Audit Adjustments

Audit adjustments recorded after the initial receipt of the trial balance or as a result of our audit procedures are attached.

Uncorrected Misstatements

Uncorrected misstatements identified during the audit are summarized in the attached Summary of Uncorrected Misstatements.

Disagreements with Management

We encountered no disagreements with management over the application of significant accounting principles, the basis for management's judgments on any significant matters, the scope of the audit, or significant disclosures to be included in the financial statements.

Consultations with Other Accountants

We are not aware of any consultations management had with other accountants about accounting or auditing matters.

Significant Issues Discussed with Management

No significant issues arising from the audit were discussed with or the subject of correspondence with management.

Significant Difficulties Encountered in Performing the Audit

We did not encounter any significant difficulties in dealing with management during the audit.

Internal Control Matters

We have issued a separate communication dated December 15, 2021 regarding certain deficiencies in internal control that we identified during the planning or performance of our audit of the financial statements.

Significant Written Communications between Management and Our Firm

In conjunction with the audit of the financial statements, we have been provided a letter of certain representations from management dated December 15, 2021.

Conclusion

This report is intended solely for the information and use of the Board of Directors and management and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Bartlett, Pringle & Wolf, LLP

December 15, 2021

Board of Directors
Ventura River Water District
409 Old Baldwin Road
Ojai, CA 93023

To the Board of Directors:

In planning and performing our audit of the financial statements of the Ventura River Water District (the District) for the year ended June 30, 2021, in accordance with auditing standards generally accepted in the United States of America, we considered the District's internal control over financial reporting as a basis for designing our auditing procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, during our prior year audit we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A deficiency in design exists when (a) a control necessary to meet the control objective is missing, or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in operation exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by

those charged with governance. We consider the following deficiencies in the District's internal control to be significant deficiencies:

Significant Deficiencies

Clerical Errors in Depreciation Schedule

During our audit, we noted a number of clerical errors in the calculation of depreciation expense for the year ended June 30, 2021. Depreciation expense calculated for certain assets placed into service in the prior fiscal year did not capture twelve months of expense in the current fiscal year. We recommend that all fixed asset schedules be reviewed by someone other than the preparer to ensure accurate reporting.

Repairs and Maintenance Costs

During our audit, we noted instances in which costs that should have been capitalized were expensed to repairs and maintenance. We recommend that all repairs and maintenance costs are reviewed in conjunction with the District's capitalization policy to ensure accurate reporting.

Prior Year Comments

The following comment appeared in our prior year letter to you dated December 16, 2020:

Significant Deficiency

Fixed Asset Addition Tracking

Original Comment:

During our audit, we noted that there is no rollforward schedule prepared for fixed assets that tracks activity including acquisitions and disposals and distinguishes current year acquisitions separately from transfer out of the Construction in process account upon being placed in service. The preparation of the statement of cash flow requires that capital assets acquired during the year be distinguishable from capital assets transferred. To prevent possible misclassification, we recommend that prior year audited schedules be retained and utilized to complete current year schedules. We also recommend that these schedules be reconciled to supporting documentation and reviewed by someone other than the preparer to ensure accurate reporting.

Current Status:

The District has implemented a fixed asset rollforward schedule for the purpose of tracking activity on both construction in progress and in-service assets. No misstatements or misclassifications were noted on the rollforward schedule during the audit for the year ended June 30, 2021.

Conclusion

This communication is intended solely for the information and use of the Board of Directors, management, and others within the District, and is not intended to be and should not be used by anyone other than these specified parties. This letter does not affect our report dated December 15, 2021 on the financial statements of the Ventura River Water District.

Very truly yours,
