

**VENTURA RIVER WATER DISTRICT
CURRENT GROUND WATER LEVEL**

AS OF: **December 1, 2022**

**Critical Static Level
Only two wells out of
five able to pump.**

**Start blending with Casitas
Water to reduce nitrates.**

Definitions
Static Level: is the level of water in the well when no water is being taken (pumped) from the well.
Pumping Level: is the level of water in the well during pumping.
Critical Satic Level: is the level where many of our wells can no longer pump water and we must use much more water from Lake Casitas.
ALWAYS CONSERVE WATER!
